List of Abbreviations MRL = Method Reporting Limit, the
ppt = parts per trillion
ppb = parts per billion
Analytical results depicted from 9/2020 through 6/2022 are EPA Method 537. Analytical results from 7/2022 to date are EPA Method 533.
EPA Method 537.1 data from 7/2022 to date is also included in the table.
Table has been sorted by sample date
All Rockland locations have been added to this supplemental report per NYSDOH Request following Q3 2022 Not all wells sampled within the quarter were operational for that quarter
*Beginning Q2 2023, Veolia Water New York made the following changes to its PFAS sampling protocol. Method 533 is used to analyze all 25 unique PFAS compounds covered by this Method as indicated on the US EPA, Office of Water, table number MS-140 dated December 2019. Method 537.1 is used to analyze only the 4 additional PFAS compounds not addressed by Method 533 as presented in the same above reference EPA table. Supplemental reports will also reflect this change beginning Q2 2023.

** As systems are placed into service, the locations of samples/analysis are modified from individial well results to the following locations per DOH requirement.
Locations include "Combine Raw", "Discharge from Lead Vessel(s)" and "Effluent"
